

# Develop A Python Script

Date	7 November 2022
Team ID	PNT2022TMID05193
Project Title	Smart Waste Management System For Metropolitan Cities.

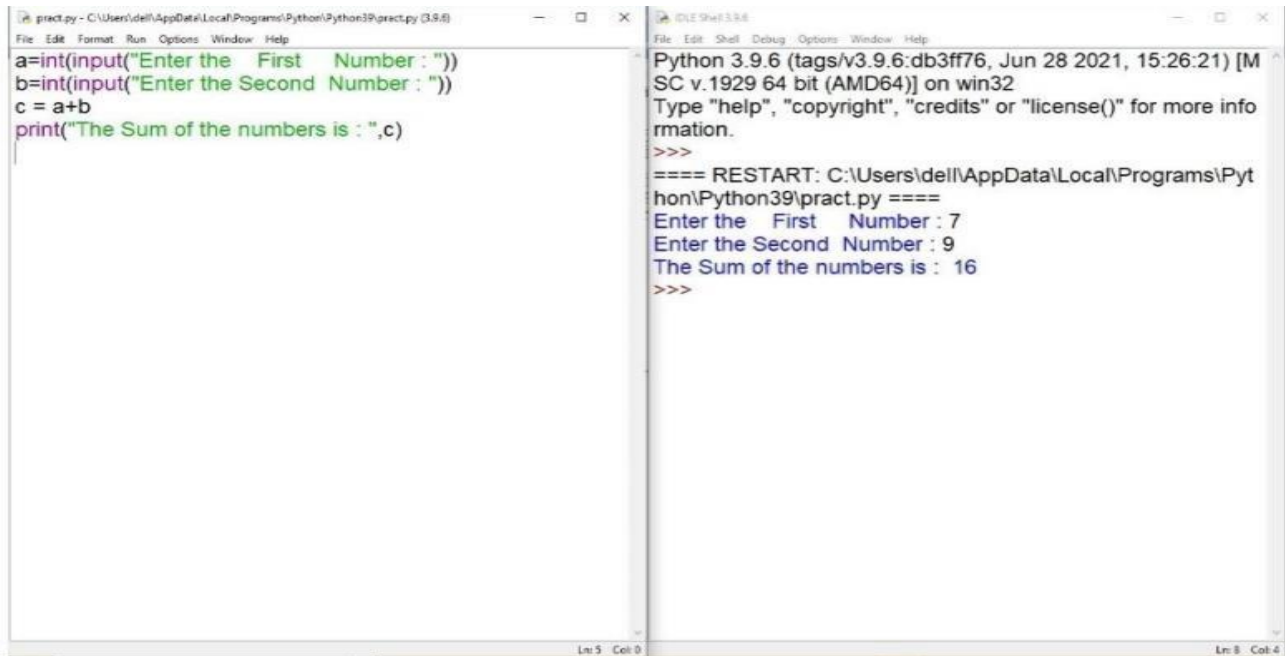

## Script:

```
a=int(input("Enter the First Number : "))
```

```
b=int(input("Enter the Second Number : "))
```

```
c = a+b
```

```
print("The Sum of the numbers is : ",c)
```

The screenshot shows two windows from the IDLE Python environment. The left window, titled 'pract.py', contains the following Python code:

```
a=int(input("Enter the First Number : "))
b=int(input("Enter the Second Number : "))
c = a+b
print("The Sum of the numbers is : ",c)
```

The right window shows the output of the script execution. It displays the Python version (3.9.6), the file path, and the execution results:

```
Python 3.9.6 (tags/v3.9.6:db3ff76, Jun 28 2021, 15:26:21) [MSC v.1929 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
